Our Stores

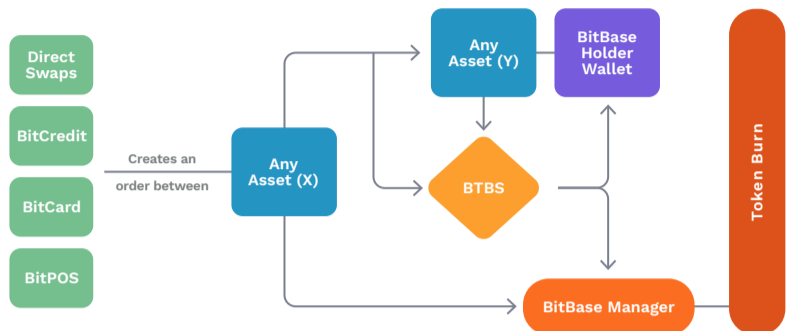

Mission

Our mission is to provide an easy, fast and secure service to help initiation into the crypto world. Our goal is to incorporate crypto products into everyday transactions and reshape how users interact with their crypto funds by bridging the existing knowledge gap.

Tokenomics

BTBS managing system fees

BTBS channels the fees during the usage of the services explained here. BitCard, BitCredit, BitPOS, and withdrawal fees are all paid in BTBS.

BTBS managing fee discounts

Staking BTBS will provide you with system fee discounts based on the amounts that are staked.

	Staking required	Fee discount
Tier 1	50.000 BTBS	50%
Tier 2	30.000 BTBS	25%
Tier 3	5.000 BTBS	10%

BTBS and liquidity

The liquidity mining systems will reward users for locking up their tokens which will provide liquidity on both DEX and CEX.

BTBS as BitBase DEX gas fee

A decentralized exchange, where BTBS will be used as the gas to run the smart contracts.

BTBS to pay listing fees

Any blockchain project can request its currency to be listed in our Stores, App, or ATMs, and will be charged in BTBS.

BTBS during token burns

A percentage of the BTBS will be burned, creating deflation by decreasing the total supply.

BTBS founding team allocation

BitBase founders participated with personal funds, as did the rest of the private sale investors.

BTBS in quadratic DAO implementation

- BitBase listing voting
- “Small Caps” fund voting
- BitBase ATMs request
- Franchise request
